MEMORANDA

On February 26, Mr. E. F. Williams saw from his front dining room window a deer with a broad brown body, across his legs as between the house and fence. Though the light faded - it continued the length of the place keeping about the same distance from the fence and sprang over the wire fence into the lumber pile and was lost to sight. This morning, Feb. 27, I was at the house. Mr. Williams showed me where the deer had gone and we went out and I examined the tracks which were perfectly distinct.

Walter Beane
Feb. 27, 1910.

MEMORANDA

I heard on Feb. 28 that a deer had been caught in Cambridge on the 27th Feb. & torn by contact with wire fences that it had to be killed. This was of course the animal of Feb. 26 seen by Mr. E. F. Williams on her lawn.

This A.M. (March 19) Mr. & I met a policeman corner of Appleton & Highland Sts. He said that on Feb 27 he saw the deer, badly wounded by wire fences, on the lawn by Fresh Pond. It was found up there that morning, and was reported to Police Headquarters. Men were sent up and the poor creature was put out of its misery - I don't know what became of the body -
